

AWS: STRENGTH IN THE FACE OF CLOUDY SKIES

Cloud adoption was already strong before the COVID-19 pandemic, but many providers and cloud computing trends were shaken by the events of the past 18 months. How have AWS and other providers been impacted in the wake of this storm?

Enterprises embrace multi-cloud

Enterprises have almost entirely adopted multi-cloud strategies. While organizations are using multiple clouds, this doesn't necessarily mean individual applications are spanning clouds.

of enterprises have a multi-cloud strategy

of enterprise workloads expected to be in public cloud in 12 months

of applications are siloed on different clouds

COVID-19 has accelerated cloud plans and spend

Cloud plans and adoption have clearly shifted as a result of the pandemic. Some of this increase is a result of the extra capacity needed for current cloud-based applications to meet added demand as online usage grows.

90% of organizations said cloud usage is higher than initially planned

Providers like AWS are enjoying the rapid growth

AWS is now the second most used IT vendor, ahead of traditional vendors such as Oracle, SAP and IBM.*

of organizations are running significant workloads on AWS, the highest in 2021

of respondents use or plan to use AWS, the highest in 2021

expect to increase their AWS spend in the coming year*
