

Manage AWS for Peak Performance

Now you can:

- Get started with a best-practice onramp for AWS
- Forecast and manage costs
- Efficiently operate AWS at scale
- Outage-proof your applications
- Integrate with hybrid clouds

What you get

Want to maximize the many advantages provided by Amazon Web Services' (AWS) highly reliable, scalable and low-cost cloud infrastructure platform? It's easy with Flexera's Cloud Management Platform (formerly RightScale CMP). Flexera's CMP enables your organization to efficiently migrate to AWS, easily consume AWS resources, operate AWS at scale and deploy resilient applications.

Get more of what you want from AWS

Like many IT professionals, you want to reap the benefits of AWS's industry-leading cloud infrastructure platform for your organization. But how can you be sure you're making the migration and deployment decisions that are right for your needs?

Flexera's Cloud Management Platform is built on years of partnership and integration with AWS, and manages many of the largest production deployments on AWS. Our suite of configuration, automation and governance features helps you chart the surest course to the cloud.

Best-practice onramp for AWS

Save time by leveraging a catalog of prebuilt, tested and proven architectures that include fully functioning open source and ISV-built software stacks. Flexera's CMP is a leading AWS system integrator and reseller, offering assistance in migration to AWS and best-practices architectures and procedures.

Forecast and manage costs

Moving to a pay-as-you-go model can be a big change for many IT departments. Flexera's CMP cloud cost calculator offers free forecasting and scenario modeling to help you better budget and plan across regions, instance types, reserved instances and more.

And once you're up and running, Flexera's CMP provides extensive cost management and reporting rolled up across AWS accounts, customizable based on how you need to see it: business unit, project, application, user and more.

Efficiently operate AWS at scale

Flexera's CMP gives you a unified environment to view multiple regions and accounts so you can efficiently administer a large and complex organization. You get complete lifecycle management including self-service provisioning, script- and model-based configuration management, server and application monitoring, advanced automation and orchestration, and a full governance and audit suite.

Outage-proof your applications

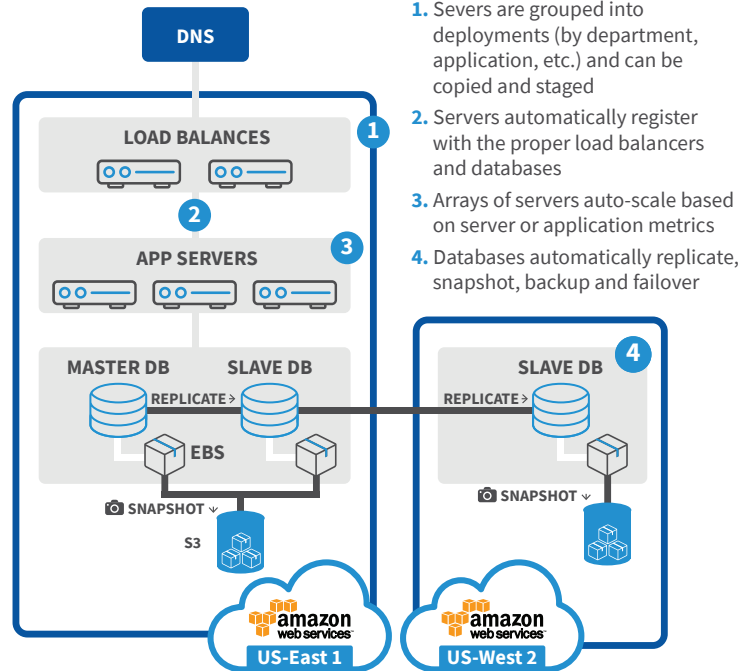

AWS provides a highly reliable, global cloud infrastructure that provides the foundation for resilient applications. Flexera's CMP makes it easy to build distributed applications and disaster recovery environments across multiple AWS regions and hybrid clouds. What's more, Flexera's CMP offers a rich set of proven cloud architectures for building highly available services on AWS.

Integrate with hybrid clouds

Flexera's CMP provides a multi-cloud platform that makes hybrid cloud integration seamless. CMP is much more than API compatibility: leading hybrid clouds use CMP to migrate workloads among AWS and hybrid environments with consistent configuration, governance and automation.

Put Flexera's CMP to work for you

Join the thousands of companies that have optimized their AWS deployment and accelerated their digital transformation with Flexera's Cloud Management Platform.
