

How Flexera supports your DORA compliance journey

When the **Digital Operational Resilience Act (DORA)** took effect in January 2025, it began to transform how financial institutions and their information and communication technologies (ICT) service providers manage cybersecurity risks. If your organization falls under its scope, you must strengthen your ICT risk management, incident reporting, third-party risk oversight, resilience testing and information-sharing capabilities to comply.

Flexera provides industry-leading solutions that can help you meet stringent DORA requirements, ensuring operational resilience and compliance with confidence.

How Flexera supports DORA compliance

1 | ICT risk management: gaining full visibility into your IT estate

DORA requires financial entities to **identify, assess and mitigate ICT risks** proactively. Organizations need **real-time visibility** into their software, hardware and cloud environments to manage vulnerabilities effectively.

- ✓ **Flexera One** provides complete visibility into **on-premises, cloud and SaaS environments**, helping organizations uncover inefficiencies and compliance risks before they escalate.
- ✓ **Software Vulnerability Manager (SVM)** enable organizations to assess, prioritize, and remediate software vulnerabilities efficiently, reducing risk across Windows, Mac, and Red Hat Enterprise Linux systems.

2 | Incident detection and reporting: proactive risk mitigation

DORA mandates strict **incident detection, response and reporting**, requiring financial entities to report major ICT-related incidents within **24 hours**.

- ✓ **Flexera's Software Vulnerability Management (SVM)** delivers real-time vulnerability intelligence, enabling organizations to identify and mitigate threats before they escalate into reportable incidents. Its comprehensive reporting capabilities—including compliance reporting and API integrations—seamlessly connect with third-party solutions.
- ✓ With **automated reporting**, security teams can streamline compliance processes and ensure alignment with DORA's strict reporting timelines.

3 | Digital operational resilience testing: strengthening cyber defenses

Under DORA, organizations must conduct **regular resilience testing**, including penetration testing and scenario-based assessments, to ensure systems remain secure.

- ✓ **Flexera One's IT Asset Management (ITAM)** solution maps IT dependencies, enabling security teams to simulate attack scenarios and identify vulnerabilities across the infrastructure.
- ✓ **Flexera's Software Vulnerability Manager (SVM)** helps organizations proactively remediate security gaps before they can be exploited in real-world cyberattacks.

4 | Third-party risk management: strengthening supply chain security

DORA mandates strict third-party risk management, requiring ICT vendors to meet cybersecurity and resilience standards.

- ✓ **Flexera's SaaS Management Platform** enables organizations to track and manage third-party software dependencies, ensuring vendor compliance with DORA's security and contractual requirements. .
- ✓ **Software Vulnerability Management (SVM)** helps organizations assess and mitigate vulnerabilities in third-party software, reducing exposure to potential threats.

5 | Cyber threat intelligence and information sharing: staying ahead of threats

DORA encourages financial institutions to share cyber threat intelligence to improve overall resilience across the sector.

- ✓ **Flexera's solution delivers real-time security insights**, enabling organizations to proactively assess risks and support industry-wide threat awareness.

Why choose Flexera for DORA compliance?

Comprehensive visibility

Gain full insight into **on-premises, cloud and SaaS assets** for effective risk management

Automated vulnerability detection and patching

Stay ahead of threats with **continuous vulnerability monitoring**

Streamlined incident reporting

Meet DORA's strict reporting requirements with **automated reporting tools**

Third-party security assurance

Ensure that your **ICT vendors** comply with DORA's resilience standards

Regulatory alignment

Leverage Flexera's **security intelligence** to stay ahead of evolving compliance mandates

About Flexera

Flexera helps organizations understand and maximize the value of their technology, saving billions of dollars in wasted spend. Powered by the Flexera Technology Intelligence Platform, our award-winning IT asset management, FinOps and SaaS management solutions provide comprehensive visibility and actionable insights on an organization's entire IT ecosystem. This intelligence enables IT, finance, procurement and cloud teams to address skyrocketing costs, optimize spend, mitigate risk and identify opportunities to create positive business outcomes.

More than 50,000 global organizations rely on Flexera and its Technopedia reference library, the largest repository of technology asset data. Learn more at **flexera.com**.
