

The complete system of record to reduce technology waste

Unlock more savings with Flexera One ITAM

Enterprises are under relentless pressure to reduce technology waste, optimize hybrid IT and strengthen compliance, yet most organizations overspend by 25-30% on software across their estate¹. Flexera One IT Asset Management (ITAM) unlocks significant cost savings by delivering precise visibility, automated compliance and intelligent optimization recommendations across software, hardware and cloud environments.

Flexera customers achieve measurable financial impact, including:

AstraZeneca realizes annual savings of
\$2 million

U.S. Department of Energy reduces time spent
researching and validating data by over
60%

The Dutch Police
reduces audits from
six a year to zero,
**saving millions
of euros**
in avoided costs

Use cases

- **Optimize license positions:** Stop overpaying for unused software. Optimize your license position from even the most complex enterprise software from Microsoft, Oracle, IBM and others.
- **Always be audit ready:** Gain a clear understanding of your software entitlements and contracts, avoid excess provisioning and generate the reports you need to back up usage claims.
- **Utilize product use right templates:** There's a difference between accurate data and great data. Product use right templates help ensure compliance and the correct versions, credits and licensing types are used to maximize savings on software licenses.
- **Complete visibility with Flexera One:** Enrich and validate your hybrid inventory across hardware, software, cloud and SaaS. Connect Flexera One SaaS Management, Cloud License Management and Cloud Cost Optimization for a complete picture of your entire IT estate.

Capabilities

Discovery and inventory

Inventory assets and get automated device-to-user mapping using multiple sources (API connectors, agent) across your hardware, software, virtualization, VDI, cloud and containerized environments.

License compliance reporting

Automatically match entitlements to applied licenses to calculate your effective license position (ELP) with data verified by [Oracle](#) (Oracle Databases, Oracle Java, Oracle E-Business Suite and Oracle Middleware).

Product use rights (PUR) engine

Streamline software procurement and deployment with auto-application of PURs, including upgrade/downgrade, DR, secondary use and VM/host rules across Oracle, IBM, Microsoft and SAP-ready logic.

Normalization and enrichment

Flexera's AI-based product catalog normalizes and enriches over 800,000 applications across 110,000 manufacturers.

Entitlement and contract management

Save time and reduce errors with AI-based importing of entitlement (invoices/POs/quotes) and contract data.

ILMT alternative

Flexera One ITAM and FlexNet Manager Suite are the only IBM license metric tool (ILMT) alternatives in the market. Manage all your IBM subcapacity licensing from one platform.

Native integration with IT service management (ITSM) tools

Flexera integrates with ITSM tools (such as BMC and ServiceNow) via Flexera One ITAM and Flexera One IT Visibility, providing seamless insights into configuration management databases.

Hardware asset management

Automate management of hardware lifecycles by getting a quick view into hardware details, warranty status and mapping to users and apps.

Cloud License Management

Connect your ITAM data to Flexera One Cloud License Management to see your available software licenses for use on cloud instances.

Not just accurate data—Optimized data

Flexera One ITAM dives deep into software contracts and entitlements so that you can make the right decisions on your software deployments, saving you more with every license. Our PUR libraries ensure that you are utilizing the right licenses, not just licenses that are compliant, so you can find additional savings throughout your software estate.

Implementation options

Flexera offers implementation options that work with your unique situation. These include:

- Self-led with Flexera onboarding services
- Partner-led with partner onboarding and optional customization services

Work with your Flexera account representative to determine the best option for your organization.

Related ITAM offerings
