

Manage the lifecycle of IT hardware assets

» COMPREHENSIVE SOFTWARE AND HARDWARE ASSET MANAGEMENT WITH FLEXERA

Hardware asset management is a critical foundation for IT asset management. From purchase to disposal, each lifecycle stage creates financial and compliance implications across maintenance costs, warranties, leases, audit exposure and end-of-life (EOL) risk. Flexera supports customers with their hardware asset management by inventorying IT hardware, tracking statuses, warranties, leases and contracts to avoid unnecessary spend and risk.

Use cases

- › Asset discovery, inventory and normalization
- › Asset ownership
- › Hardware details and asset history
- › Hardware to application mapping
- › Hardware costs, depreciation and cost allocation
- › Warranty and lifecycle status and user relationship

» CAPABILITIES

Asset discovery, inventory and normalization

Identify and consolidate hardware and software asset data and licenses with methods such as agent, API connectors and REST APIs. Normalization and enrichment spans 3.7M hardware titles

Hardware costs, depreciation and cost allocation

Import contracts and invoices manually or use the AI-based invoice/PO/quote ingestion feature. Track depreciation and the current value of assets and allocate costs by owner

Asset ownership

Ownership can be linked from device usage or assigned based on enterprise group such as cost center, corporate unit or location

Hardware details and asset history

Capture manufacturer, model, serial number, assigned user, ownership details, processor count, MAC addresses, warranty etc. Get a detailed view of the history of changes to each asset

Warranty and lifecycle status

- Status types—In Transit, Active, In Maintenance, Retired
- Track lease and warranty status

Hardware to application and user relationship mapping

- Device to user (calculated with last 10 logins or via corporate policy)
- Device to application/service

Security and peace of mind are standard

Flexera One provides a range of data storage locations across the world to enable customers to meet their data residency and privacy requirements. Our solution is proven safe and secure with industry SOC 2 Type 2, ISO/ISE 27001 and Cloud Security Alliance: STAR certifications.

Implementation options

Flexera offers implementation options that work with your unique situation. These include:

- Self-led with Flexera onboarding services
- Partner-led with partner onboarding and optional customization services
- Partner-led outcome driven managed services

Work with your Flexera account representative to determine the best option for your organization.

About Flexera

Flexera helps organizations understand and maximize the value of their technology, including the rising costs and risks introduced by AI, saving billions of dollars in wasted spend. Our Flexera One platform connects the dots between what technology you have, how it is used, what it costs, and where it creates risk, helping teams take control of the increasingly complex IT estate across cloud, SaaS and on-premises. We are leading the way to unify IT asset management, FinOps and SaaS management with high fidelity data from Technopedia, our proprietary reference library of technology asset data, and intelligent automation fueled by AI. That's why thousands of global organizations rely on the Flexera One platform and Technopedia.
