

A shorter path to SaaS savings

Flexera One SaaS Management

Flexera One SaaS Management enables organizations to discover, optimize and govern their SaaS environments with unmatched visibility, control and intelligence. Built on mature capabilities from Flexera and Snow, it delivers the broadest discovery

coverage in the market, robust optimization tools and integration with enterprise-wide IT Asset Management (ITAM), FinOps and governance workflows.

Now you can see the complete picture—and act on it.

Core capabilities: Multi-source discovery

Uncover all of your SaaS applications in use—whether officially sanctioned or not—across users, devices and departments.

Browser extension

Capture browser-based SaaS activity, including shadow IT and AI tools

SSO integration

Track user access and login activity

CASB connectors

Leverage existing Microsoft Defender integrations for network-based discovery

API connectors

Directly connect to major applications like Salesforce, Adobe, Microsoft 365, ServiceNow and others

Agent-based discovery

Track hybrid and on-premises software usage

Financial system integration

Detect spend on unmanaged or unrecognized tools

No one discovery method is enough. Flexera combines multiple sources to provide a comprehensive view.

Cost optimization and license management

Drive efficiency and value across your SaaS portfolio.

- Identify inactive and underutilized licenses
- Rationalize redundant or overlapping applications
- Track entitlements and optimize usage for complex vendors including Salesforce, Microsoft and Adobe
- Gain multi-currency tracking and department-level cost allocation
- Prepare with pre-renewal analytics for effective vendor negotiations and renewal planning

» HIGHLIGHT

Save up to 35% in SaaS cost reduction through optimization and rationalization

Security and governance

Reduce risk, enforce access controls and support compliance initiatives.

- Identify external users and orphaned accounts
- Uncover cloud-to-cloud integrations and associated risks
- Automate onboarding and deprovisioning workflows
- Discover browser-based AI tools and unauthorized applications
- Monitor usage of internal/private applications for rationalization and budgeting

» HIGHLIGHT

Security is built-in —not bolted on

Visibility

Gain complete insight into your SaaS environment

Cost optimization

Maximize the value of every SaaS dollar spent

Security and governance

Reduce risk and ensure compliance at scale

Who benefits?

- Enterprises with decentralized SaaS purchasing and limited visibility
- Organizations managing complex vendor relationships and hybrid application estates
- Teams tasked with SaaS optimization, security, compliance or cost control
- ITAM, FinOps, security and procurement functions seeking a unified platform for cross-team collaboration

Seven use cases

Use case	Key features
Shadow IT discovery	Browser extension, CASB and financials integration
License optimization	Usage-based rightsizing and entitlement matching
SaaS cost allocation	Multi-currency support and department tagging
Renewal management	License utilization insights and contract planning
Lifecycle automation	On/offboarding workflows and workflow orchestration
Private app visibility	URL-based tracking and usage analytics
Compliance support	Risk detection, AI visibility and audit readiness

Integration and extensibility

- Native integrations with ServiceNow, SSO/IdPs, CASBs and expense systems
- Workflow automation hooks for SaaS lifecycle management (e.g., joiner/mover/leaver events)
- Powered by **Flexera Technopedia®** for application normalization, categorization and vendor metadata
- REST API support and **Snow Atlas** compatibility for extensibility

Deployment options and availability

- Available as part of the **Flexera One** platform for hybrid IT and SaaS management
- Compatible with **Flexera One** and **Snow Atlas** environments
- Supports deployment at enterprise scale, including centralized and federated models

Entitlements and upgrade paths may vary depending on your existing Flexera or Snow solutions. Contact your Flexera account team for enablement guidance.

About Flexera

Flexera helps organizations understand and maximize the value of their technology, saving billions of dollars in wasted spend. Powered by the Flexera Technology Intelligence Platform, our award-winning IT asset management, FinOps and SaaS management solutions provide comprehensive visibility and actionable insights on an organization’s entire IT ecosystem. This intelligence enables IT, finance, procurement and cloud teams to address skyrocketing costs, optimize spend, mitigate risk and identify opportunities to create positive business outcomes.

More than 50,000 global organizations rely on Flexera and its Technopedia reference library, the largest repository of technology asset data. Learn more at **flexera.com**
