SCALE. STABILITY. PERFORMANCE.

FLEXEra
Inform IT. Transform IT.

- More than 30 years of visionary industry leadership in delivering enterprise IT management solutions

- Offices across the globe; headquartered in Chicago, Illinois, USA

- Over 50,000 customers worldwide supported by more than 1,300 team members

- Recognized by Gartner as a leader in both software asset management tools and cloud management platforms

Flexera gives companies clarity into their technology "black hole," helping business leaders turn IT insight into action. With a portfolio of integrated solutions that deliver unparalleled technology insights, spend optimization and agility, Flexera helps enterprises realize IT's full potential to accelerate their business.

SoftwareONE and Flexera solutions optimize your digital transformation

Together, SoftwareONE and Flexera can manage and proactively impact over 60% of your IT spend.

Legacy Modernization

Legacy systems often fail to perform as needed due to their overly complex structure. Reduce complexity with the ability to:

Review end of service life data

Application rationalization – remove redundant applications, versions, capabilities and unused applications

Advanced integrations – automate software deployments, mobile device management

Procurement Empowerment

Software procurement is a big ticket item in procurement landscape and having a managed dashboard to see the health of the assets and spends is a big relief.

Achieve end-to-end visibility into your supply chain, from catalog through asset retirement

Advanced advisory and negotiation services – help optimize major publishers such as Microsoft, Adobe, Oracle and IBM

Cost Optimization

Address the critical area of unused assets procured from various publishers which is an unseen budget wastage.

Cloud cost optimization – 35% of all cloud spend is being wasted by cloud users

Ongoing entitlement normalization; achieve and maintain over 98% IT asset recognition

Automated reclamation of software – 36% of all software is wasted, unused or little used

Risk Management

Our compliance and governance expertise brings in best practices through robust tool-kits to ensure that the enterprise is in compliance with the legal asset usage agreements with publishers.

License, deployment and compliance optimization

Uncover software vulnerabilities

Discover shadow IT and secure user accounts

CLOUD MANAGEMENT

AUTOMATION & GOVERNMENT

SOFTWARE LIFECYCLE MANAGEMENT

RISK MANAGEMENT

DATA INTELLIGENCE

SoftwareONE currently has the most certified Flexera consultants throughout the world. We have certifications in both technical (implementation) and operational (managed services) solutions. SoftwareONE currently employs more Software Asset Management consultants (over 600) than any of the major consultancies.
