

# **Complex environments present complex challenges**

## **Simplify with a holistic view of your entire IT estate**

The increasing complexity of hybrid IT environments also makes IT contracts and licenses complex—and a challenge for executives managing IT environments. But with a holistic view of your entire IT estate—available only from Flexera One's Vendor Workspace—you can see your way to making game-changing IT decisions.

## **Arm yourself with actionable insights to make data-driven decisions**

Take Microsoft, for example. Your organization might have multiple Microsoft applications spanning on-premises (SQL) to SaaS (O365) to the cloud (Azure). Identifying spend and usage data across all these different applications from just this single vendor can be daunting. In order to manage your Microsoft estate, it's important to be able to answer a host of questions about spend, risk and more.

### **TO MANAGE YOUR VENDOR ESTATE, YOU NEED ANSWERS TO ESSENTIAL QUESTIONS:**

- What are all the elements in my vendor estate?
- What's my total spend by category and how is it trending?
- What's my total product footprint and how exposed am I to currency risk?
- How is my spend aligned with my transformation objectives?
- Which vendor assets am I utilizing the most?
- What's my vendor effective license position (ELP) and is it compliant?
- What are my key trends?

Now you can answer these questions with confidence. Vendor Workspace gives you the most complete and up-to-date view of your hybrid IT environment from on-premises to SaaS to cloud. We compile your technology data, compare it to your contractual entitlements and give you a unified view of your spend, risk and optimization possibilities.
